FULL LIST of BOOKS and PAPERS (in Journals, Books, Proceedings)
August 2015

Prof. Francesco MAINARDI (Mathematical Physics)
Department of Physics and Astronomy, University of Bologna
Via Irnerio 46, I-40126 Bologna, Italy
E-MAIL: francesco.mainardi@bo.infn.it  francesco.mainardi@unibo.it
HOME PAGE: http://www.fracalmo.org/mainardi/index.htm
PROFILE http://scholar.google.com/scholar?hl=en&lr=&q=f+mainardi

BOOKS

This book contains selected lectures held at the CISM Course organized by the Editors, held in Udine (Italy) from 23 to 27 September 1997, entitled “Scaling Laws and Fractality in Continuum Mechanics”. The book includes the survey lessons by Gorenflo-Mainardi [62] and Mainardi [63].

PAPERS

The impact of papers and books can be derived in GOOGLE-SCHOLAR where one gets the citations: http://scholar.google.com/scholar?hl=en&lr=&q=f+mainardi
One can recognize that several papers have more than 100 citations.
A number of papers are freely available as E-PRINTS being posted at http://arxiv.org/find/all/1/all:+AND+Francesco+Mainardi/0/1/0/all/0/1

N.B. Since 1 November 2013 Francesco Mainardi is retired Professor from the University of Bologna. For a national law of Italian Rectors retired professors cannot insert their publications in the data base of their Universities, and, unless they get teaching contracts, they are deleted from the web site of their Universities. For Prof. Mainardi the following web site is nowadays still accessible: https://www.unibo.it/sitoweb/francesco.mainardi

(2011) -> (2009)      [143] -> [137]          p. 6

[166] R. Gorenflo and F. Mainardi: “On the fractional Poisson process and the discretized stable subordinator”, Axioms, Vol 4 (2015), pp. 321-344; DOI:10.3390/axioms4030321 This article has OPEN ACCESS. It belongs to the Special Issue “Special Functions: Fractional Calculus and the Pathway for Entropy” dedicated to Professor Dr. A.M. Mathai at the occasion of his 80th birthday, Guest editor Prof. Dr. Hans J. Haubold. See: http://www.mdpi.com/journal/axioms/special_issues/special_functions-fractional_calculus. N.B. A version was posted as E-print at arXiv:1305.3074 and it will be soon updated

In 1967 a group of physicists from the University of Bologna, led by A. Zichichi, published a proposal to search for a heavy lepton using the Frascati (e + e - ) collider. Key pages of this proposal are reproduced in the book “The origin of the third family: festschrift Zichichi on the 30th anniversary of the proposal to search for the third lepton at ADONE”, World Scientific, Singapore (1998).
